

# First Crossing Of Atlantic By A Vessel Using Steam Was Made A Hundred Years Ago

This year marks the centenary of the first crossing of the Atlantic Ocean by a vessel using steam all the way. The historic voyage was made by a Canadian-built wooden paddle-steamer, the "Royal William". To commemorate this notable event the Canadian Post Office Department is issuing a special postage stamp.

The "Royal William," built at Quebec, was launched in April, 1831, and towed to Montreal to be fitted with engines developing 200 horse-power. Her cost when ready for sea was \$75,000. Her dimensions were: length over all 176 feet; depth of hold 18 feet; breadth over paddleboxes, 44 feet. She was originally intended to ply between Montreal and Quebec and to St. Louis, and, in 1832, when the building her was carried out by a group of Quebec and Halifax merchants, assisted by a grant of \$10,000 from the Government of Lower Canada. Among the shareholders appear the names of three Cunard brothers, of whom later founded the present Cunard Line.

After three moderately successful voyages in 1831 to Halifax and intermediate ports she had to go to the bottom in 1832, owing to a cholera epidemic, she made only one voyage, and her owners were bankrupt.

In the spring of 1833 a new company was formed, which purchased the vessel and, for a time, used her for towing and local excursions. Then in June, 1833, she sailed on a trip to Boston, where she was enthusiastically received as being the first steamship to ply the Union Jack to establish the United States port.

On her return to Quebec her owners decided to send her to England for sale. It was on this voyage that she made history, demonstrating to the world the feasibility of navigating the oceans by means of steam-propelled vessels, notwithstanding the declaration of critics that "they might as well talk of making a voyage from Quebec to the moon."

Early in August, 1833, she left Quebec for Pictou, in the Northumberland Strait, where she spent several days coaling, storing up provisions, and awaiting passengers. Eventually, on August 17th, she commenced out of Pictou on a trip to England. Her clearance papers stated she was a vessel of 363 tons bound for London, that among the goods carried were 254 children of coal (648 tons), a consignment of ship's stores, a box of stuffed birds, one harp, one box, one violin, household furniture and seven passengers, all British. Her master was John McDougall. During the voyage the starboard engine was disabled, and the vessel sprang a leak. After 25 eventful days and nights the "Royal William" arrived at Gravesend, where the vessel was sold for \$50,000 and chartered to the Portuguese Government as a troopship. Captain McDougall retained command and took her out to Lisbon, where she was successfully offered for sale to the Portuguese.

In 1834 the ship was bought by the Spaniards, sent to Gravesend to be converted into a "war-steamer," and returned to the Spanish coast, and on May 5, 1836, in the Bay of San Sebastian, she earned the distinction of being the first steamer of war to fire a hostile shot. In 1840 she was sent to Bordeaux for repairs but was converted into a hulk. Her engines were transferred to a new ship of the same name, which ultimately sank off the Algerian coast during a violent storm in 1869.

And so, with her hull rotting in Bordeaux harbour, and her engines lying at the bottom of the Mediterranean Sea, the "Royal William" ended her distinguished and varied career.

A memorial tablet in the Canadian House of Commons commemorates the first trans-Atlantic voyage by the "Royal William."

**The Friendly Border**  
Pat Campbell made the 500-mile trip from the Prairies to Winnipeg with his dog cutie on the way to Chicago. Fair and on reaching the border found that he would have to put up \$200 and \$2 for each of entering the land of the free. Once again, says the Stratford Beacon-Herald, that is the same friendly international border about which orators speak at banquets.

France is testing out a new type of wet pocket watch.

## Famous "Bull-Dog Ants"

Professor Stiles Primitive Australian Insects Are Vicious Creatures. The only formidable "animals" in the Australian bush are poisonous snakes and the famous "bull-dog ants," according to Dr. William Morton Wheeler, professor of entomology at Harvard University.

The "poisonous" or primitive ants of Australia sometimes reach more than an inch in length, are "angularly" alert, wasp-like, large-eyed, long-jawed and fiercely stinging creatures. The larger species live in mound nests which may be from 1 to 5 feet in diameter and the population of a colony is from 150 to 200 individuals, said Dr. Wheeler.

## Russian Cannot Own Dogs

**Must Be Killed For Skins To Clothe Soviet Army**  
In a short while there will be no dogs in Russia. A new Soviet decree orders all owners of dogs to deliver their animals immediately to special dog pounds. The animals will be killed and their skins sent to Government fur factories to be converted into uniforms for the Soviet Army. It is expected that 3,000,000 skins will be obtained in this manner, sufficient for the army's requirements.

By Ruth Rogers

643

Here's a charming model for the heavier figure. The partial belt treatment creates a lengthened line. The skirt while slender, indicates an easy flare at the hemline.

It is simple, smart and becoming in brown and white crinkle crepe. It's a dress that will carry you through an entire day.

It will cost you but a small sum to make it, and will take very little of your time.

Plain grey, beige or black with white trim.

Style No. 643 is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3 1/2 yards of 36-inch material; size 46, 5 yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wm. C. C. Co.

**How To Order Patterns**  
Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Pattern No. .... Size .....

Town .....

Expeditions to the north and south poles are thrilling, but Lady Hubert Wilkins, wife of the famous Australian explorer, prefers the less adventurous joys of domestic life. She is now in New York where her husband is on one more polar trip and then settle down to real home life.

## One Of London's Mysteries

**No One Knows Why City's Smallest House Was Built**  
London's smallest house is now for sale. Wedged in between two tall mansions in Hyde Park Place, it is only six feet wide and just twenty feet long. It consists of a tiny entrance hall and one room on the ground floor and two more rooms above. Joining them is a narrow iron ladder which a fat man could not possibly ascend.

Still it is a real house with a number and a letter box, but no knocker or bell. No one has lived in it for some time, though it has occasionally been used as a servant's bed room by the owners of the house next door. How such a tiny place came to be built in one of London's little mysteries. It is said that about 60 years ago a certain Miss Jubb, who lived next door, had it built for her maid to fit the little house in mind when she described the home of Mr. and Mrs. Darling in "Little White Bird."—London Correspondent.

## New Industry In Canada

**Montreal Factory Producing Nicotine Sulphate**  
Nicotine sulphate is now being produced in Montreal in commercial quantities, according to the Marketing Division of the Dominion Seed Branch. The plant is designed to manufacture in sufficient volume to meet Canadian requirements and supply some export business as well. Free nicotine is another product of the same plant. All tobacco grown on the Ontario and Quebec crop serves as the raw material. The nicotine sulphate manufactured there is of standard 99 per cent strength and in appearance and volatility is equal or superior to the best imported from other countries.

## More Farms In Canada

**Increase Has Been Only In Four Western Provinces**  
During the last two decades there has been an increase of 49,325 farms in Canada. In the five western provinces there was a total decrease of 51,703 farms, while there was an increase of 97,997 farms in the four western provinces. A gradual shifting from land ownership toward tenancy is taking place in all provinces except in Quebec where there is a slight increase in land ownership. The shifting to tenancy is particularly noticeable in western provinces.

## Standard Huskel

Unless a huskel by measure is especially agreed upon, it must weigh the following number of Standard Canadian pounds: Clover seed, beans, wheat and peas, 60; Indian corn and rye, 56; barley, buckwheat, timothy seed, 48; hanged, 44; castor beans, 40; malt, 36; oats, 34, and blue grass 14 pounds.

## Our Country Canada has a Future

They're selling 1934 calendars now.

## EXPLORES WIFE PREFERS HOME

Seven skeletons in the "crouched" position, which denotes that their burial took place in the bronze age, have already come to light. A notable feature in each case was that the bodies had been buried facing the setting sun.

## Saskatchewan Butter Output

**Production Of Creamery Butter For Month Of July**  
Saskatchewan's output of creamery butter during July has set a new high record, it was announced.

Total output for the month totalled 3,231,998 pounds. This represents an increase of 172,743 pounds, or 5.6 per cent, over the corresponding figures for the same month of 1932. Although the increase is most marked in the northwestern part of the province, the increase is quite general over the entire province.

## Put To Some Use

In a curio exhibition held in connection with a village flower show at Oxford, England, the other day the second prize was awarded for a walking-stick made from the paper of 3,000 love letters.

## May Have Trip To Canada

Mr. and Mrs. C. W. Lawrence, who have looked after the comfort of Canadian holiday tourists in the Canadian but at the great expense of meetings at Blaisy, England, for the past several years, are planning to visit Canada in a party of Canadian workmen.

## Canada's Fruit Crop

**Apples Will Be Plentiful But Other Fruits Scarce**  
The Dominion Department of Agriculture estimates the 1933 crop of apples, peaches, grapes and plums will be lower than last year, but that apples will be more plentiful. In a survey published recently, the department placed an estimate of 4,338,000 bushels for the Canadian apple crop, compared with 3,977,000 bushels last year.

Canada's pear crop this year was estimated at 431,000 bushels, compared with 468,000 bushels last year. The peach crop was placed at 813,000 bushels, a drop of 91,000 bushels from 1932. The plum crop was estimated at 22,000 bushels, only 79 per cent. of last year's total. Due to failure in Ontario, the Canadian grape crop was estimated at 43,568,000 pounds, compared with 51,100,000 pounds last year.

## Trade Within Empire

**Canada's Trade Shows Increasing Exports To Empire Countries**  
All British Empire countries, but the British West Indies, imported more from Canada during the first four months of the current fiscal year than for the corresponding period a year ago, according to figures issued by the Dominion Bureau of Statistics.

Australia's imports from Canada during the first four months of the current fiscal year, while those of the United Kingdom increased 34.8 per cent. from \$4,697,811 to \$6,222,280. Imports of Canadian goods into British India rose 25.9 per cent. to \$89,114 and to South Africa 16.6 per cent. to \$1,553,323. New Zealand's imports were up 9.2 per cent. to \$1,055,033 and those of Newfoundland 1.1 per cent. to \$1,823,864.

## Cougars Menace Ranchers

**Residents Of West Coast Of Vancouver Island Lash Livestock**  
Residents of Port Alice, on the west coast of Vancouver Island, walk the streets armed with shotguns and rifles to protect themselves and their property against marauding cougars that descend almost daily on the island.

## Horns Of Forest Reserve Guardian

**8,120 Feet Above Sea Level**  
Perched on a narrow patch of crumbled rock, 8,120 feet above sea level, where he lives all summer as one of the provincial government's Bow River forest reserve guardians, Arthur Shantz told a reporter that "it'd be all right if I could keep the cougar out of the forest, but the government would give me enough paint to cover the cabin."

## Relic Of Bronze Age

**Interesting Discovery Made Near Oxford, England**  
Burials which took place 4,000 years ago are being unearthed near the village of Cassington, a few miles from Oxford, where a by-pass road is being constructed to divert traffic from the university city.

## Remain Within Empire

**New Zealand Will Not Become An Independent Sovereign State**  
Up to the present New Zealand has taken no steps to alter the status of Westminster, according to a paper presented at the fifth biennial convention of the Institute of Pacific Relations by W. A. Curzon-Siggers, lecturer in public international law at the University of Oxford.

## Saskatchewan Butter Output

**Production Of Creamery Butter For Month Of July**  
Saskatchewan's output of creamery butter during July has set a new high record, it was announced.

## Put To Some Use

## Wheat Situation Is Discussed At Round Table Conference Of Pacific Relations Institute

Discussion of the wheat situation and its effect upon international relations marked a round-table conference of the Institute of Pacific Relations.

A Canadian delegate opened the discussion with an authoritative account of developments in Canadian wheat since 1927, the emergence of a serious grain, measure taken to cope with it, impact of foreign tariff upon Canada's export trade, and negotiations at home and elsewhere for coping with the situation.

Under present conditions the member said, the view is impracticable that the wheat growing industry of Western Canada may be described as bankrupt, and its plight is being aggravated by the fact that the world is suffering from a shortage of wheat. He thought, however, there is considerable hope of advantage to the wheat grower in some international arrangement between the major wheat exporting countries whereby they would agree to establish terms of sale and to control deliveries. He believes such a scheme would be established and would not only help to raise the price level but would, in a few years, result in a curtailment of acreage because farmers would not continue to grow wheat which they could not market.

If an export quota system were introduced it would be necessary to establish a wheat board which would keep export marketing within a single channel.

It was agreed if the process of industrialization continues in Japan she will be bound to seek food supplies in the cheapest market and will probably increase her import of wheat.

A delegate from the Dutch East Indies declared the tendency of Java to become a wheat producer, and the expansion of the wheat market in China is problematical, it was indicated, as many Chinese do not consider wheat their superior article of food, and there is also an increase of local wheat production.

## Unridden To The Last

**Bucking Horse Retires From Rodeo Still Unconquered**

## Canada A Healthy Nation

**Bulletin Of Life Insurance Company  
Gives Interesting Facts**  
The lowest mortality on record was  
registered for the first six months of

933 among nearly 1,250,000 Canadian industrial policyholders of the Metropolitan Life Insurance Company and the prospect of a new minimum death rate being established in Canada in

The death rate for all causes combined among this group of Canadians is 4.6 per cent, lower than for the first half of last year. Canadians are

making a better health record this year than are United States industrial policyholders, for the death rate of the latter is running well over three per cent. higher than for the first six months of 1932.

Reductions among Canadian policyholders from previous low points for diseases of major interest, according to the insurance company's statistical bulletin, are as follows: diphtheria, 77 per cent; tuberculosis, 1.6 per cent; diarrheal conditions, 17 per

Pointing out a number of decided contrasts in the course of the death rates from important diseases this year in Canada and the United

States, the bulletin says:  
 "The mortality from diabetes which had been steadily rising in both countries for years, has recorded a considerable drop in Canada; in the United States the marked upward

The heart disease death rate is unchanged this year in Canada, whereas in the United States cardiac conditions have been responsible for many more deaths than in the like part of 1932.

"The cancer mortality rate has risen only negligibly in Canada; but it has come up appreciably in the United States. Deaths from pneumonia, on the other hand, have increased a little in Canada as compared with a pronounced drop in the United States to a new low point."

**People Buying Insurance**  
Sales Total In Canada For July  
Thirty Million Dollars

A total of \$1,395,000 of new policies for ordinary life insurance was written in Saskatchewan last month, according to figures compiled by the Life Insurance Sales Research Bureau.

Sales totals by provinces were: Alberta, \$1,249,000; British Columbia, \$1,968,000; Manitoba, \$1,908,000; New

Brunswick, \$735,000; Nova Scotia, \$1,020,000; Ontario, \$12,961,000; Prince Edward Island, \$53,000; Quebec, \$8,709,000; Saskatchewan, \$395,000.

In Newfoundland sales by the same companies totalled \$257,000, an increase over the corresponding months of 1932.

### Preventing Silver Waste

---

#### Loss In U.S. Runs To Thousands, Dollars Annually

Science is endeavoring to find a convenient way to recover the hundred tons of silver that are annually discarded, says a developer

photographs in the United States. The value of the metal at current prices is nearly \$800,000. Experiments by research workers indicate that the process of electrolysis proves more efficient than the other methods. Electrolytic methods employed at a large film studio saved \$17,000 in 18 months. Twelve hundred troy ounces

of silver could be regained from every million feet of film developed.

A MESSAGE TO THE

## Alberta Grain Growers

The Alberta Wheat Pool closed its books on July 15th for the 1932-33 business year. The organization is pleased to state that the volume of business transacted during the year was the highest Pool elevators have ever enjoyed.

The natural conclusion is that the thousands of grain growers who have given their patronage to this growers-controlled co-operative are appreciative of the services rendered and are determined to build up within the boundaries of this Province a strong and aggressive organization on a co-operative basis.

The organization invites and would appreciate during the new crop year a continuation of the patronage so generously extended in the past. Those who have never before utilized Pool elevator facilities are invited to do so with the assurance that careful, courteous and efficient attention will be given to all business entrusted to it.

The welfare of agriculture in Alberta would suggest that all grain growers should be concerned in the upbuilding of a truly co-operative elevator organization, owned and governed by the grain growers of the province and interested primarily in the welfare of Alberta agriculture.

Alto—Father, I dreamed last night you gave me a dollar.

Father—Well, as you've been a good boy lately, you can keep it.

Purser, fifty cents for another pitcher of water?

Every mill, but if I take any more tea or coffee in the baggage car, ain't going to keep.

Patent—I believe I'm a little better, doctor, but I'm still short of breath.

Dr. Kilham—I can stop that completely after a few more treatments.

He's been at it a long time, but Uncle Henry finally has built something which neither looks nor sounds like a Ford.

It's a sad thing to witness good boys between young lovers, but we suppose the millinery set used it.

A visitor in the village was greatly interested in all he saw. In particular he noticed that one of the inhabitants was treated with marked respect by the others.

"I observe," remarked the visitor, "that you all treat that man with marked deference."

"Yes," was the answer, "he's one of the early settlers."

"Early settlers?" asked the other.

"Who he can't be over 30."

"That may be true," replied the old man, "but he pays all his bills promptly on the first of every month."

Little Heekle had a dog that was a great nuisance around the house and the father threatened to dispose of him, but the boy pleaded to be able to keep him. Finally, however, his father offered him \$5 to get rid of the dog, adding, "I don't care what you do."

The thought of so much money was too much for Heekle and he agreed to the bargain. Next day he announced: "I've got rid of Heekle."

That's right my boy, I'm glad you've done it, and hence your \$5. How did you get rid of him?

I traded him to Peacock for two pups.

During the engagement at the taking of We Hai Wee in North China at which a killy regiment participated, the following conversation took place between Donald and Sandy:

Donald, meeting Sandy, exclaimed: We have taken We Hai Wee!

Sandy said: Yes, we have!

Donald: Yes, we have!

A Chinese standing by said: He says Chinese quicken.

## Let Us Do Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT
